

## SUMMARY OF THE ENERGY (ENERGY MANAGEMENT) REGULATIONS, 2025

These regulations provide a framework for energy consumers, particularly for designated facilities (facilities that consume above 180kwh annually), to monitor, report, and improve their energy use through audits, implementation of energy efficiency measures, and submission of compliance reports. The regulations aim to promote sustainable energy management and reduce energy consumption across the various sectors.

The regulations provide for a framework for

- Continuous monitoring and reporting of energy use,
- Mandatory energy audits,
- Licensing of professionals (auditors and managers),
- Submission of compliance reports,
- Implementation of energy-saving measures.

### Key Components of the Regulations

#### 1. Licensing

<i>License Type</i>	<i>Scope of Work</i>
<b><i>EMVP Auditor</i></b>	Undertake investment-grade & general audits, and perform measurement & verification of energy performance.
<b><i>Energy Auditor – Category 1</i></b>	Undertake investment-grade and general energy audits.
<b><i>Energy Auditor – Category 2</i></b>	Undertake general energy audits.
<b><i>Energy Manager</i></b>	Coordinate and promote energy efficiency and conservation within a designated facility.

#### 2. General Energy Audits

- Frequency: At least one audit every 4 years.
- Submission: Report to be submitted to the Authority within 30 days of audit completion.
- Review: Authority responds within 30 days.

- Rejection: Resubmission within 30 days or re-audit within 6 months.
- Upon Approval:
  - Submit an Energy Investment Plan within 6 months.
  - 50% implementation of the plan required within 3 years.
  - Submit annual progress reports.
- Inspection: Can occur at any time.

### **3. Quality Control Audits**

- Conducted by the Authority.
- Facilities to receive a minimum of 5 days' notice before audit.

### **4. Energy Benchmarks**

- Authority to publish minimum benchmark requirements.
- Facilities that are not meeting benchmarks must:
  - Prepare and submit a remedial plan to the authority;
  - Implement the remedial plan within 2yrs from the approval date.

### **5. Energy Savings Trading Scheme**

- Scheme valid for 4 years.
- To be revised based on audit findings.
- The authority will develop a trading platform for ease of acquiring of valid credits.
